Education

Ryan International School (Mayur Vihar Phase -3 , Delhi)
CBSE 10th – 92% (2020) — CBSE 12th – 93.8% (2022)

Bennett University (Greater Noida) **Sep. 2022 – May 2026**
Bachelor of Technology in Computer Science

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Internet Technology
- Computer Architecture

Experience

Customer Engineering Intern Jun 2026 – Present
TestMu AI (formerly LambdaTest), Noida *5 Days WFO*

- Work directly with global developers, QA engineers, and DevOps teams to debug automation scripts and resolve real-world testing issues on TestMu AI's AI-native cloud test-execution platform, spanning a grid of 10,000+ real device, browser, and OS combinations.
- Reproduce customer-reported issues, isolate root causes in automation and execution environments, and collaborate closely with Engineering and Product teams to validate and ship fixes.

Software Engineer Intern Feb 2026 – April 2026
Echelon Edge Pvt. Ltd.

- Analyzed operational and business datasets using SQL, Python, and Excel to identify trends, inefficiencies, and performance gaps.
- Worked on a key project which involved the use of multiple frameworks such as FastAPI, React and database system such as PostgreSQL.
- Collaborated with operations and management to convert analytical findings into actionable recommendations.

Projects

PhytoSense – AI Plant Disease Detection | *HTML, CSS, JavaScript, Gradio*

- Built a web app that predicts plant diseases from an uploaded leaf image via an embedded Gradio ML model (up to 96% accuracy).
- Designed a responsive, mobile-friendly frontend with dark mode and scroll-reveal animations.

Bengaluru Renter's Copilot | *Python, Playwright, XGBoost, SQLite, Streamlit, Power BI*

- Built an automated pipeline scraping NoBroker and Telegram rental groups into an 8-table SQLite schema (1,500+ listings, 40+ localities); benchmarked regex vs. Gemini Flash field extraction (90.2% vs. 89.2%).
- Trained an XGBoost rent-pricing model with geospatial features (CV MAPE ∼23%, R^2 0.68) to flag listings ≥15% below fair rent, served on a Streamlit deals board and a Power BI report.

Credit Risk & Fraud Detection System | *Python, XGBoost, Scikit-learn, Pandas*

- Built a credit-risk model on 150,000 borrower records; XGBoost reached AUC 0.868, Gini 0.735, KS 0.577, beating LR and Decision Tree baselines, with risk tiers showing a 22x default-rate spread.
- Added label-free fraud detection with Isolation Forest (4x default-rate lift) and combined both into an Approve / Conditions / Reject / Review lending decision matrix.

Technical Skills

Languages: Python, Java, C++, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: TensorFlow, Keras, NumPy, Pandas, Scikit-learn, Transformers, KeyBERT, Matplotlib, Docker
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, MySQL, Gradient.ai
Specialized Skills: LLM Fine-tuning (LoRA, QLoRA, PEFT), REST APIs, Model Optimization, Data Processing, Cross-Browser/Device Debugging

Achievements & Certifications

- GATE CSE 2025 and 2026 Qualified
- Qualified for Smart India Hackathon
- **DeepLearning.AI (Coursera)**: Generative AI with Large Language Models
- **National Taiwan University (Coursera)**: Operations Research (2): Optimization Algorithms
- **DeepLearning.AI (Coursera)**: Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization
